ABOUT US

Founded on the principles of innovation and excellence, Chentronics has been at the forefront of ignition technology solutions for over five decades. Our expertise lies in designing and manufacturing high-energy ignition systems for industrial applications, providing reliable and efficient solutions that enhance safety and performance.

At Chentronics, we are committed to delivering the highest quality products and services to our customers worldwide. Our state-of-the-art facility and dedicated team of professionals work tirelessly to ensure that our ignition systems meet the most stringent industry standards. We take pride in our ability to tailor solutions to the unique needs of our clients, fostering long-lasting partnerships built on trust and mutual success.

Innovation drives us forward, and continuous improvement is part of our DNA. As we look to the future, Chentronics remains dedicated to pushing the boundaries of technology, developing sustainable and efficient solutions.

Thank you for choosing Chentronics. We look forward to being your trusted partner in ignition technology.

WHAT WE DO BEST

High Energy vs. High Tension Ignition

Traditional high tension ignition systems use high voltage transformers to create constant sparks across an open gap. These systems are prone to fouling from moisture and contaminants, struggle with liquid fuels, and require frequent igniter replacements in dual-fuel setups.

Chentronics High Energy Ignition uses low-voltage capacitor-stored energy to deliver powerful, precisely timed spark bursts. This design enables a self-cleaning igniter that resists contamination, supports multiple fuel types, and switches between liquid and gas fuels without hardware changes.

For critical combustion applications, Chentronics offers superior durability, efficiency, and fuel flexibility, ensuring better uptime and operational control.

IGNITER WEAR AND SPARK INDICATOR COLOR STATES

Chentronics Predictive Diagnostic Systems

Our high-energy ignition systems include a proprietary predictive diagnostics circuit, allowing operators to prevent missed starts proactively.

KEY BENEFITS

- **Real-Time Feedback:** Receive spark status updates via a blue light indicator or digital signals to your burner management system, depending on the exciter model.
- **Efficient Maintenance:** Get clear alerts when igniters need replacement, reducing missed starts and improving the safety of your testing process.
- **Enhanced Troubleshooting:** Cut down time and effort for system maintenance and diagnostics.

EXCITERS

SURESPARK LO (07070404)

Our most popular ignition system capable of handling all gaseous and light liquid fuels and has full Chentronics predictive diagnostic capabilities with indicator lights.

Key Features

- Input Power 100-240VAC
- Output 12 Joule @ 2, 4, or 6 Sparks Per Second (SPS)
- Various configurable output options

Certifications:  

TYPICAL SURESPARK LO SYSTEM WITH 02 SERIES OUTPUT HARDWARE FOR NON-HAZARDOUS AREA APPLICATIONS (NO. 2 OIL OR GAS)

	DESCRIPTION	FEATURES	TYPICAL PART NO.
SINGLE EXCITER	SURESPARK LO EXCITER	<ul style="list-style-type: none"> • 4SPS exciter • Diagnostic led indicators for tip wear • Output connection: two-wire MIL style • Stainless steel, painted steel or fiberglass enclosure • Optional momentary switch 	07070404-ZZ1 
	HARNESS	<ul style="list-style-type: none"> • Straight • Input and output connectors: two-wire MIL style 	03000350 
ONE NEEDED PER EXCITER OUTPUT	BASE ROD	INPUT CONNECTOR Two-wire MIL style	OUTPUT CONNECTOR 02 SERIES FEMALE 02000300

For specific part numbers to your application, see IGNITERS catalog section

EXCITERS

SURESPARK LO DUAL (07072404)

Two individual SureSpark LO exciters housed in a shared enclosure, designed to handle all AC power turbine applications. Includes full Chentronics Predictive Diagnostics capabilities.

Key Features

- Input Power 100-240 VAC
- Output 12 Joule @ 4 Sparks Per Second (SPS)
- ARP670 Type 5F output

Certifications: 

TYPICAL SURESPARK LO SYSTEM FOR FRAME 7FA TURBINES (NO. 2 OIL OR GAS)

	DESCRIPTION	FEATURES	TYPICAL PART NO.
DUAL EXCITER	SURESPARK LO EXCITER	<ul style="list-style-type: none"> • TWO-4SPS independent exciters • Diagnostic led indicators for tip wear • Stainless steel enclosure Output connectors (two): ARP670 TYPE 5F, pressure sealed Saves space when multiple exciters are required. 	07072404-GXI 
	HARNESS	<ul style="list-style-type: none"> • In-line pressure seal Flexible conduit Straight or elbow ends Input and output connectors: • ARP670 TYPE 5M DIV 2 & zone 2 rated 	RP44613NI

EXCITERS

MTE (C7778002)

Our DC input system (MTE) is capable of handling all gaseous and light liquid fuels. It is turbine-ready, including full Chentronics predictive diagnostic capabilities.

Key Features

- Input Power 11-28 VDC
- Output 2 Joule @ 5 Sparks Per Second (SPS)
- ARP670 Type 2F output

Certifications:    

APPLICATIONS WITH EXCITER INSTALLED IN A NON-HAZARDOUS AREA

	DESCRIPTION	FEATURES	TYPICAL PART NO.
ONE NEEDED PER EXCITER OUTPUT	MTE	<ul style="list-style-type: none"> • 3-6 SPS Exciter • 11-28VDC Input Voltage • Spark Diagnostic for detecting tip wear • Output Connection: ARP670 Type 2F • 316 Stainless Steel • D50DIV 2/ZONE 2 rated 	<p>C7778002-UYZ</p> 
	INPUT HARNESS	<ul style="list-style-type: none"> • Custom length cable • Quick connect or flying leads available • HAZ-Loc and non-haz versions 	<p>03008002-1</p> 
	OUTPUT HARNESS	<ul style="list-style-type: none"> • Straight or Elbow Ends • Input and output connectors: ARP670 Type 2M • DIV 2 & zone 2 rated 	<p>RD442MNI-01</p> 
	IGNITER	<ul style="list-style-type: none"> • Patented flush gap tip • Many length and OD configurations possible • Input connection: ARP670 Type 2F 	<p>09000175</p> 

For specific part numbers to your application, see IGNITERS catalog section

EXCITERS

SURESPARK RF (07000502)

A system designed for marine and heavy fuel oil applications, including full Chentronics Predictive Diagnostics capabilities.

Key Features

- Input Power 100-240 VAC
- Output 12 Joule @ 20 Sparks Per Second (SPS)
- Various configurable output options

Certifications: CE

TYPICAL SURESPARK RF SYSTEM WITH 02 SERIES OUTPUT HARDWARE FOR NON-HAZARDOUS AREA APPLICATIONS (NO. 6 OIL)

	DESCRIPTION	FEATURES	TYPICAL PART NO.
SINGLE EXCITER	SURESPARK RF EXCITER	<ul style="list-style-type: none"> • 20SPS exciter • Diagnostic led indicators for tip wear • Output connection: two-wire MIL style • Painted steel or fiberglass enclosure • Optional momentary switch 	07000502-ZZ1 
	HARNESS	<ul style="list-style-type: none"> • Straight or elbow ends Input and output connectors: two-wire MIL style 	03000350

EXCITERS

SMARTSPARK (07000124/07000224)

Simplify your burner ignition with our direct mount 'On the Rod' ignition system. Certified to North American (07000124) and European (07000224) standards.

Key Features

- Input Power 100-240 VAC
- Output 4 Joule @ 15 Sparks Per Second (SPS)
- Chentronics Type 2 Output

Certifications:    

TYPICAL SMARTSPARK SYSTEM WITH 12 SERIES OUTPUT HARDWARE FOR HAZARDOUS AREA APPLICATIONS (NO. 2 OIL OR GAS)

DESCRIPTION	FEATURES	TYPICAL PART NO.
EXCITER & POWER CABLE	SMARTSPARK EXCITER <ul style="list-style-type: none"> • 100-240VAC 50/60Hz Input voltage • Stainless steel enclosure • Output connector: 02 series female 	<div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <p>cETLus SYSTEM</p> <p>07000124-XX</p>  </div> <div style="text-align: center;"> <p>ATEX SYSTEM</p> <p>07000224-XX</p>  </div> </div> <p>OR</p>

For specific part numbers to your application, see IGNITERS catalog section

IGNITER SIZING

Choosing the right igniter is crucial to your project's success. Chentronics offers a wide range of igniters. Here's how to select the best fit:

- 1 OUTER DIAMETER (OD)**
Ensure the igniter fits your existing guide tube. Our igniters are classified by OD, ranging from 0.875 in down to 8 mm, making your search easy.
The correct OD is the first step in your igniter selection.

- 2 INSERTION LENGTH**
Determine how far the igniter's spark needs to reach inside the burner. Measure the distance from your burner opening to the spark location on your current hardware.
This distance defines the insertion length.
- 3 TOTAL LENGTH**
Account for any obstacle outside the burner such as fuel lines, air lines, walls, or railings. Add this clearance to your insertion length to get the igniter's total length.
Total length ensures the igniter clears all external obstructions.

HARNESSES AND RODS

Connecting your exciter to your igniter is simple with Chentronics. Choose the exciter and igniter that fit your unit, match the connectors, and specify the required length for your setup.

All of our harnesses are custom-made to your specifications and can be tailored to any length you need. Our rods are available in lengths ranging from 6 inches to 12 feet, accommodating your specific insertion requirements. We make integration easy and precise for optimal performance.

IGNITERS

If you're in search of an igniter for boilers, burners, pilots or other applications, Chentronics offers a diverse selection to meet your needs. Our igniters range in outer diameters from 8mm (0.31") to 0.675", ensuring we have a solution that fits your specific requirements. Explore our range to find the perfect igniter for your application:

IF YOUR TURBINE ISN'T LISTED PLEASE GIVE US A CALL (607) 334-5531. WE'RE EAGER TO EXPLORE NEW OPPORTUNITIES AND ADD YOUR TURBINE TO OUR GROWING CATALOG.

iScan[®]3+

The Chentronics iScan3+ is an all-in-one solution designed to meet diverse fuel conditions with its dual UV and IR sensor capabilities. This ensures you always have the right tool for the job.

iScan3+ SELECTION TABLE				
Do you need marine capability?	Yes 04005100-B1		No 04005100-A1	
Do you need flame discrimination?	Yes 04005100-B1-MB	No 04005100-B1-SB	Yes 04005100-A1-MB	No 04005100-A1-SB
Do you need a response time delay?	No N/A	Yes 04005100-B1-SB-04	No N/A	Yes 04005100-A1-SB-04

Advanced Features

- **Bluetooth Connectivity:** Built-in, read-only Bluetooth enables real-time data viewing and recording on connected devices for easy troubleshooting and data acquisition.
- **Ring of Light:** Provides clear visual feedback on burner conditions, helping operators monitor flames and maintain equipment effectively.
- **Dual-Spectrum Flame Detection:** Simultaneous UV and IR sensors deliver superior flame discrimination and reliable operation in diverse conditions.

Certifications:   

Choose the iScan3+ for comprehensive flame scanning technology that enhances operational efficiency and equipment management.

iScan3+ FIBER OPTICS & ACCESSORIES

Harsh environments with high vibration and temperature can shorten detector life, increase costs, and often require complex solutions like air or liquid cooling. The Chentronics iScan3+ offers a smarter alternative: remote mounting. Place the iScan3+ safely away from these conditions and use a fiber optic cable at the burner location instead.

Proven across turbines, burners, and boilers, this system protects critical electronics while delivering the same reliable data as a direct mount. Custom fiber optic cables ensure clear flame visibility and simplify maintenance through convenient remote access.

In addition to remote mounting via fiber optic cable, Chentronics offers a variety of other key accessories for iScan3+:

- **IR Filter (04000120):** Enhances iScan3+ performance in gaseous applications when other flames are in the area by blocking visible and IR wavelengths above 750 nm while passing UV near 310 nm—reducing false alarms and improving discrimination of background flames.
- **Power Supply Display Module (04005800):** Provides reliable 120/220 VAC → 24 VDC conversion and centralizes wiring for the iScan quick-connect, with a local visual display of flame, signal, and faults to speed diagnostics and minimize downtime.
- **Flame Simulator (04005700):** Portable, calibrated UV reference source (USB-C, long battery life) that lets technicians verify and troubleshoot iScan3+ performance in the field, cutting service time and ensuring measurement confidence.
- **Remote Mounted Ring of Light (04005815):** Remote visual indicator for cabinets or field enclosures that shows live flame status without opening panels, improving safety and reducing unnecessary maintenance visits.
